- **Select tests from list on requisition**: 10  
- **List other test(s) required**: 11  
- **Provider Signature and date**: 12

---

Misidentified patient samples are a patient safety risk as they may lead to delayed testing or the wrong diagnosis and treatment. Incomplete requisitions or improperly labelled samples may result in delays or test rejection. Requisition information and sample labels must match *exactly*.

Please ensure each specimen has two patient identifiers, and site of specimen noted, with the requested tests indicated on the requisition.
