

Active Screening – Notice of Positive Screening

Novel Coronavirus (2019-nCoV)

As of January 30, 2020, the World Health Organization declared coronavirus a public health emergency of international concern. For this reason, LifeLabs has implemented a series of proactive measures as a precaution to limit the risk of further transmitting the virus.

Therefore, we regret that we will be unable to provide laboratory service to customers who have:

- Fever and symptoms of lower respiratory illness or pneumonia, AND
- Returned from China within the last 14-days OR:
- Have had close contact with an ill individual who is under investigation in relation to the coronavirus outbreak.

Note to Patient:

*****Action Required*****

Please return immediately to your Health Care Provider or nearest Emergency Department and provide this form for appropriate medical consultation.

Note to Health Care Provider:

*****Action Required*****

LifeLabs is unable to provide medical consultation on this patient having met the requirements for positive screening. If required, please contact your Public Health Unit for further instruction/consultation.

If your patient does not meet the requirement for Coronavirus positive screening, please have your patient return to LifeLabs with this signed form.
